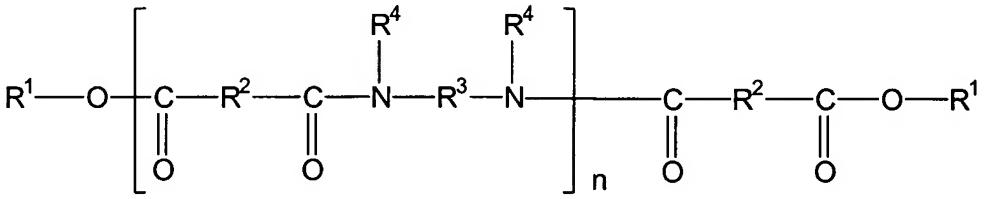
AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application. Please amend claim 153.

Claims 1-150 (canceled).

Claim 151 (previously presented): A composition comprising at least one liquid fatty phase which comprises at least one fluoro oil, wherein the at least one liquid fatty phase is structured with at least one structuring polymer chosen from polyamide



polymers of formula (I):

in which:

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one polyamide polymer ranges from 10% to 50% of the total number of all ester groups and all amide groups comprised in said at least one polyamide polymer;

R^1 is independently chosen from alkyl and alkenyl groups with at least 4 carbon atoms;

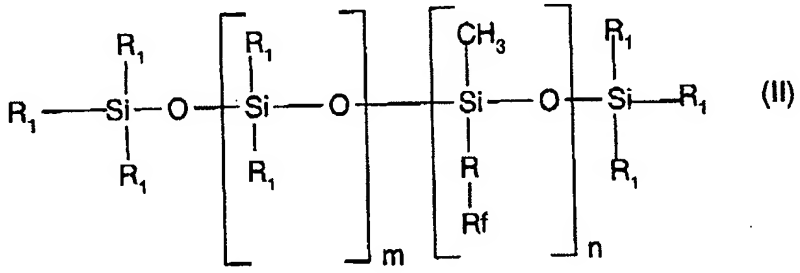
R^2 is independently chosen from C_4 to C_{42} hydrocarbon-based groups, wherein 50% of the R^2 groups are chosen from C_{30} to C_{42} hydrocarbon-based groups;

R^3 is independently chosen from organic groups with at least 2 carbon atoms, hydrogen; and

R^4 is independently chosen from hydrogen and C_1 to C_{10} alkyl groups, wherein at least 50% of the R^4 groups are hydrogen.

Claim 152 (previously presented): The composition according to claim 151, wherein said at least one structuring polymer is present in the composition in an amount ranging from 0.5% to 80% by weight relative to the total weight of the composition.

Claim 153 (currently amended): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluorosilicone compounds of formula (II):



(II)

wherein:

R is chosen from linear and branched divalent alkyl groups with from 1 to 6 carbon atoms;

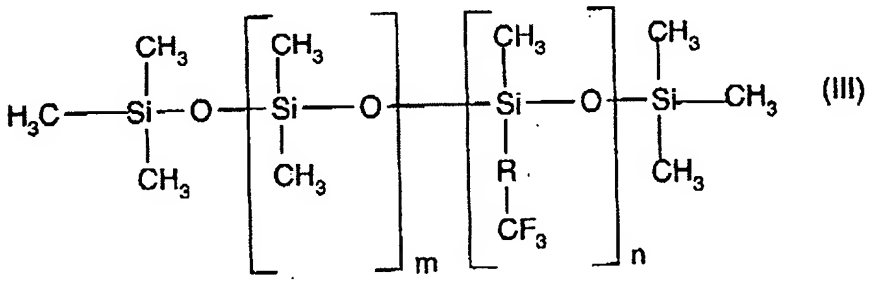
Rf is a fluoroalkyl radical ~~containing~~ with from 1 to 9 carbon atoms;

R_1 is independently chosen from C_1-C_{20} alkyl radicals, hydroxyl radicals, and phenyl radicals;

m ranges from 0 to 150; and

n ranges from 1 to 300.

Claim 154 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluorosilicone compounds of formula (III) below:



(III)

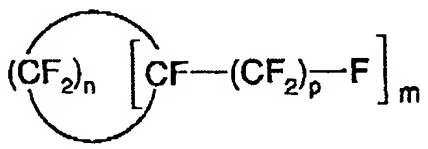
wherein:

R is chosen from divalent methyl, ethyl, propyl, and butyl groups;

m ranges from 0 to 80; and

n ranges from 1 to 30.

Claim 155 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from perfluorocycloalkyls of formula (IV):



(IV)

wherein:

n is equal to 4 or 5;

m is equal to 1 or 2; and

p ranges from 1 to 3;

with the proviso that when m = 2, the $(CF_2)_p$-F groups are not necessarily alpha to each other.

Claim 156 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluoroalkyl and heterofluoroalkyl compounds of formula (V):

$$CH_3\text{-}(CH_2)_n\text{-}[Z]_t\text{-}X\text{-}CF_3 \qquad (V)$$

wherein:

t is 0 or 1;

n ranges from 0 to 3;

X is chosen from linear and branched divalent perfluoroalkyl radicals with from 2 to 5 carbon atoms; and

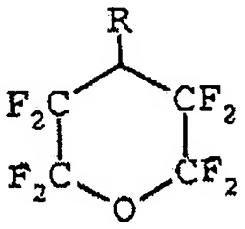
Z is chosen from O, S, or NR, R being hydrogen, a radical $-(CH_2)_n-CH_3$, wherein n is defined as above, or $-(CF_2)_m-CF_3$, wherein m ranges from 2 to 5.

Claim 157 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from perfluoroalkane compounds of formula (VI):

$$CF_3\text{-}(CF_2)_n\text{-}CF_3 \qquad (VI)$$

wherein n ranges from 2 to 6.

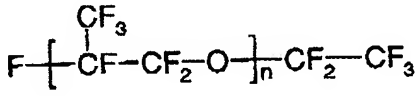
Claim 158 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from perfluoromorpholine derivatives of formula (VII):



(VII)

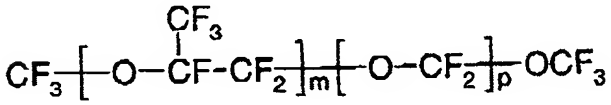
wherein R is chosen from C_1-C_4 perfluoroalkyl radicals.

Claim 159 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from the perfluoropolyethers of formulae (VIII) and (IX):



(VIII)

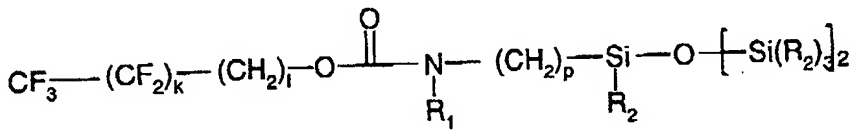
wherein n ranges from 7 to 30; and



(IX)

wherein the ratio m/p ranges from 20 to 40, and the molecular weight ranges from 500 to 20,000.

Claim 160 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluorosilicone compounds of formula (X):



(X)

wherein:

k ranges from 1 to 17;

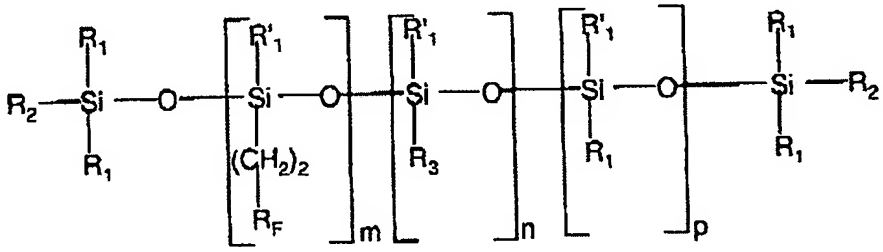
l ranges from 1 to 18;

p ranges from 1 to 6;

R_1 is chosen from hydrogen and C_1-C_6 alkyl radicals;

R_2 is chosen from C_1-C_6 alkyl radicals and $-OSi(R_3)_3$, R_3 being chosen from C_1-C_4 alkyl radicals.

Claim 161 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluoroalkylsilicones of formula (XI):



(XI)

wherein:

R_1 and R'_1 are independently chosen from linear and branched alkyl radicals with from 1 to 6 carbon atoms, and phenyl radicals;

R_2 is chosen from R_1, -OH, and $-(CH_2)_f-R_F$, f being an integer ranging from 0 to 10;

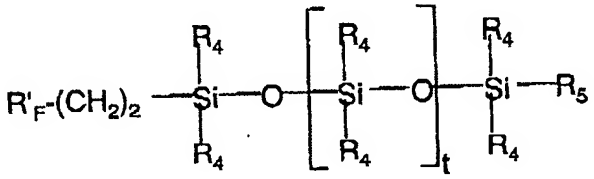
R_3 is chosen from linear and branched alkyl radicals with from 6 to 22 carbon atoms;

R_F is chosen from $-(CF_2)_q-CF_3$, q being an integer ranging from 0 to 10;

m and n are independently chosen from an integer ranging from 1 to 50; and

p is an integer ranging from 0 to 2,000.

Claim 162 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is chosen from fluoroalkylsilicones of formula (XII):



(XII)

wherein:

R_4 is chosen from linear and branched alkyl radicals with from 1 to 6 carbon atoms, and phenyl radicals;

R_5 is chosen from linear and branched alkyl radicals with from 6 to 22 carbon atoms, and phenyl radicals;

R'_F is chosen from $-(CF_2)_s-CF_3$, wherein s is an integer ranging from 0 to 15; and

t is an integer ranging from 1 to 2,000.

Claim 163 (previously presented): The composition according to Claim 151, wherein the at least one fluoro oil is present in an amount ranging from 0.1% to 50% by weight, relative to the total weight of the composition.

Claim 164 (previously presented): The composition according to Claim 151, further comprising at least one additional oil, other than the said at least one fluoro oil.

Claim 165 (previously presented): The composition according to claim 151, wherein said at least one liquid fatty phase further comprises one additional ~~non-volatile~~ oil, said additional oil being chosen from non-volatile oils.

Claim 166 (previously presented): The composition according to claim 151, further comprising at least one volatile solvent.

Claim 167 (previously presented): The composition according to Claim 151, wherein the at least one liquid fatty phase further comprises an apolar oil.

Claim 168 (previously presented): The composition according to Claim 151, wherein the at least one liquid fatty phase is present in an amount ranging from 5% to 99% by weight, relative to the total weight of the composition.

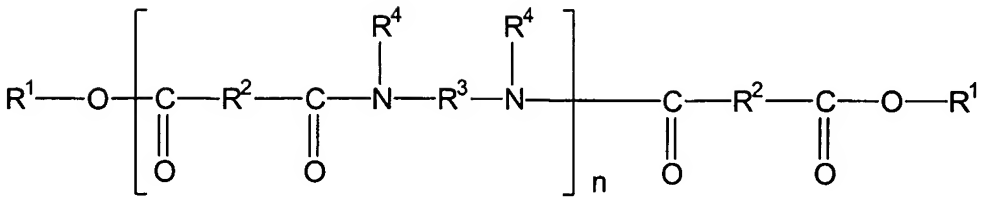
Claim 169 (previously presented): The composition according to Claim 151, further comprising at least one dyestuff.

Claim 170 (previously presented): The composition according to Claim 151, further comprising at least one additive chosen from water, antioxidants, essential oils, preserving agents, fragrances, fillers, waxes, fatty compounds that are pasty at room temperature, neutralizers, polymers that are liposoluble or dispersible in the physiologically acceptable medium, cosmetic agents, dermatological active agents, and dispersants.

Claim 171 (previously presented): The composition according to claim 151, wherein the composition is in the form of a rigid gel or stick.

Claim 172 (previously presented): The composition according to claim 151, wherein the composition is a cosmetic composition chosen from mascara, eyeliner, a foundation, a lipstick, a blusher, a deodorant product, a make-up-removing product, a body make-up product, an eye shadow, a face powder, a concealer product, a shampoo, a conditioner, an antisun product, a bodycare product, a facial care product, or a nail varnish.

Claim 173 (previously presented): A process for caring for, making up, or treating a keratin material, comprising the application to the keratin material of a cosmetic composition comprising at least one liquid fatty phase which comprises at least one fluoro oil, wherein the at least one liquid fatty phase is structured with at least one structuring polymer chosen from polyamide polymers of formula (I):



in which:

- n is an integer which represents the number of amide units such that the number of ester groups present in said at least one polyamide polymer ranges from 10% to 50% of the total number of all ester groups and all amide groups comprised in said at least one polyamide polymer;

R^1 is independently chosen from alkyl and alkenyl groups with at least 4 carbon atoms;

R^2 is independently chosen from C_4 to C_{42} hydrocarbon-based groups, wherein 50% of the R^2 groups are chosen from C_{30} to C_{42} hydrocarbon-based groups;

R^3 is independently chosen from organic groups with at least 2 carbon atoms, hydrogen; and

R^4 is independently chosen from hydrogen and C_1 to C_{10} alkyl groups, wherein at least 50% of the R^4 groups are hydrogen

wherein the at least one liquid fatty phase and the at least one polyamide polymer form a physiologically acceptable medium.
